## Minutes of the Client Meeting

Team 05

Yiwei Zhang, Lei Jin, Shuchen Wu, Yen You Chew

Friday 1st April 2022

Note taking for the meeting:

Shuchen Wu

### 1 Time and Place

The group meeting for the Master of Computing & Innovation Group Project was held online at 2:30 pm on Friday 1st April 2022.

### 2 Function reduction

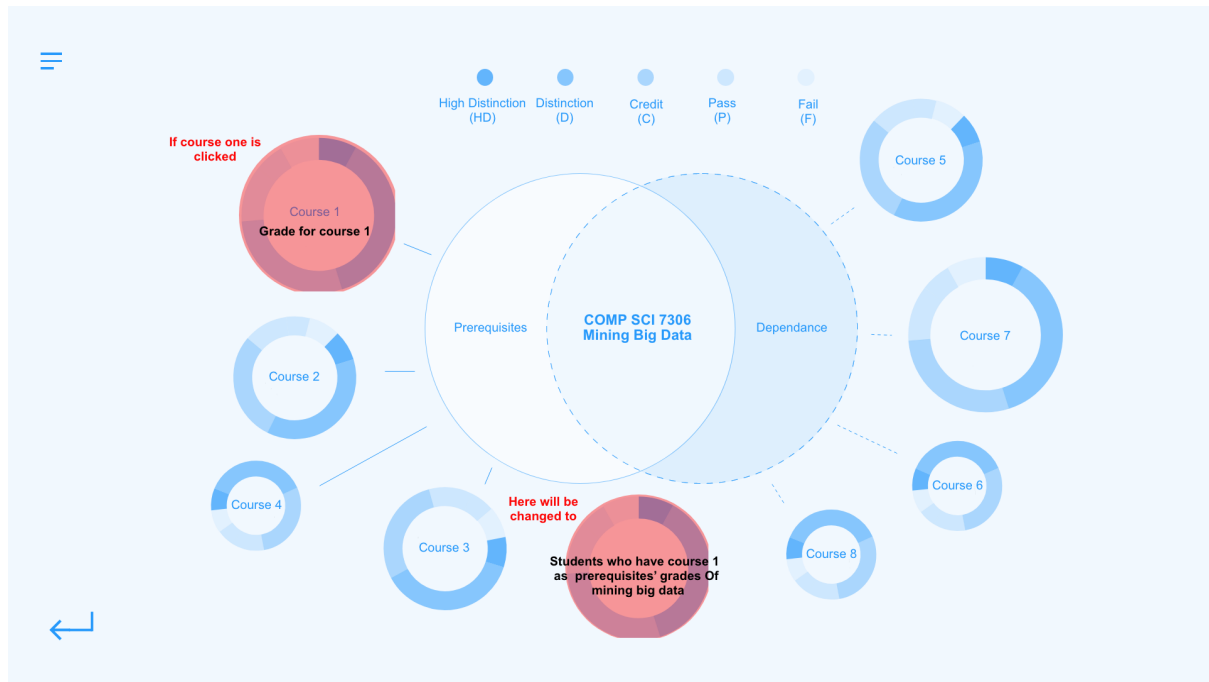

Degree Path and Career path Navigation functions will be cut off for this project.

### 3 Function adjustment

#### 3.1 Course relationship adjustment

Courses 1- 4 should display the grades of these courses themselves. There should be a chart that has the student's grade on mining big data. If course 1 is clicked, the chart of the grade of mining big data should be changed to the student who has course 1 as a prerequisite's grade of mining big data. The following images explain the above situation.

Purpose of the function:

Course coordinators will be able to identify which course study as a prerequisite will be helpful for this course so that course coordinators can recommend this prerequisite course to students.

## 2.2 Function name adjustment

Course Recommendation -> Course Advisor

## 2.3 Project name adjustment

Student process analyst -> understanding the students' pathway
