

MCI Project Weekly Time Sheet

Team 05 Student ID a1817812

Week starting: 07

Day	Date	Time In	Time Out	Total hours	Task	How does it fit into project plan?	Outcome/Next action
Monday	25/04/2022	1:30 PM	2:30 PM	1	Project group meeting	This is our weekly group meeting for updating our progress.	During the meeting, we have discussed the progress of our website, we had finished the login function and partially finished the search function. Next we are going to continue the coding for the search page.
Tuesday	26/04/2022	9:00 AM	12:30 PM	3.5	Data Restructuring	Our data collections need to be reformed considering the query efficiency.	The old data collections 'courses' and 'dependencies' were split into 'courses', 'grades', and 'dependencies', this improves the query speed of our website when doing only course related search.
Tuesday	26/04/2022	2:00 PM	8:30 PM	6	Programming for relationship-display page	This is one of the pages we have to develop for our course relationship functionality.	Our current pie chart component has some display issues such as randomly shows grade distribution, I did some research online and tried to find third party solutions to solve this problem. Still in progress.
Wednesday	27/04/2022	10:00 AM	3:00 PM	5	Programming for relationship-display page	Continue the task of yesterday.	Created a PieChart component in our react project, next will try to retrieve data from our backend.
Thursday	28/04/2022						
Friday	29/04/2022	1:30 PM	10:00 PM	8.5	Programming for relationship-display page	Keep finishing the components for relationship_display page.	The page element bar charts was set to four and could not dynamically change with the actual prerequisite number. I have been trying to fix this problem.
Saturday	30/04/2022						
Sunday	1/05/2022	9:30 AM	10:30 AM	1	Project group meeting	Update progress with group members.	We discussed the display page of course relationship and the showcase for client next week. Next we are still focusing on optimizing the functionality.
