Minutes of the group Meeting

Team 05

Yiwei Zhang, Lei Jin, Shuchen Wu, Yen You Chew

Tuesday 2nd June 2022

Note taking for the meeting:

Shuchen Wu

1 Time and Place

The group meeting for the Master of Computing & Innovation Group Project was held face to face, at 2:00 pm on Tuesday 2nd June 2022.

2 Goal of the week

2.1 Develop the content of the poster.

2.2 Develop client's extra requirement: multi-select grades to investigate performance on prerequisite and dependency courses. With the feature, users should be able to select multiple grades of the prerequisite to see how the performance in the prerequisite will impact on the current course. (same with the dependency display/search)

2.3 Repeat input handler on course Advisor Search page.

3 Post structure

3.1 Introduction

3.2 Scope (describe two functions)

3.3 A chart of User flow of the website

3.4 Key Components of the website

3.5 Website system architecture and tools we use

3.6 compare the outcome (plan and actual/add-ons)

3.7 Future extensions

3.8 Conclusion

(Work as a group on google docs, finish the content by Thursday morning)

4 Task allocation

4.1 Yiwei Zhang: Backend API of selecting multiple course grade and return corresponding of performance in prerequisite/dependency

4.2 Shuchen Wu: Frontend multiple grade select effect

4.3 Yan You Chow: connect the backend and frontend of the multi-select feature

4.4 Alvin: Repeat input handler on course Advisor Search page
