

## MCI Project Weekly Time Sheet

Team 5 Student ID a1790922 Week starting: 12

Day	Date	Time In	Time Out	Total hours	Task	How does it fit into project plan?	Outcome/Next action
Monday	30/05/2022	1:30 PM	3:30 PM	2	Client meeting	We schedule client meetings and group meeting every Monday after the workshop time.	We synced our current progress with the client. Clients are very satisfied with the success of our projects.
Tuesday	31/05/2022	10:00 AM	12:00 PM	2	Group meeting	We discussed the current progress and final tasks that need to be done.	We decided to fulfill the customer's extended requirements. The client asked us to select multiple grades instead of just one grade in the course relationship feature. I will modify the backend API to support entering an array of grades instead of a single grade.
Tuesday	31/05/2022	12:00 PM	7:00 PM	7	Course Relationship API extension	Fulfill client's expansion needs.	I have completed the modification of the API, but there is a problem because if it becomes a set of grades so that the number of queries that need to be greatly increased. The function is good, but the query efficiency still has room for optimization.
Tuesday	31/05/2022	7:00 PM	8:00 PM	1	Testing	High-quality project delivery is inseparable from code testing.	Currently the new feature is normal and there is no abnormality.
Wednesday	1/06/2022	8:00 PM	10:00 PM	2	Group meeting discuss poster content	The poster can show the audience what they can't see in the demo of our project.	We discussed the division of labor for poster drafts. We referenced the examples provided by the lecturers and designed our own outline. I will be responsible for the system architecture, used software and tools and future extensions.
Wednesday	1/06/2022	10:00 PM	11:30 PM	1.5	Write the poster content	The poster can show the audience what they can't see in the demo of our project.	Completed my own part of the draft and modified the system architecture diagram as needed.
Thursday	2/06/2022	11:00 AM	1:30 PM	4	Consultation with Cruz and group meeting	The poster can show the audience what they can't see in the demo of our project.	We asked some questions about the poster layout and the cruz also made some suggestions for our content.
Thursday	2/06/2022	1:30 PM	6:30 PM	5	Improve poster as suggested	The poster can show the audience what they can't see in the demo of our project.	Modified respective sections as suggested. Next, we will walk through the poster together.
Friday	3/06/2022						
Saturday	4/06/2022	8:30 PM	10:30 PM	2	System testing	High-quality project delivery is inseparable from good testing.	I designed some test cases and tried them. After that I also actually used the system to simulate real usage according to my interests. The test results are all good.
