

MCI Project Weekly Time Sheet

Team 05 Student ID a1817812

Week starting: 09

Day	Date	Time In	Time Out	Total hours	Task	How does it fit its project plan?	Outcome/Next action
Monday	9/05/2022						
Tuesday	10/05/2022	10:00 AM	6:00 PM	8	Meet up with group mates for discussing and coding together for our web application.	We decided to work together to improve the efficiency since we were falling behind a little.	Partially finished the merging of new search box to our web application. The data transmission from the frontend to the backend still needs to be done.
Wednesday	11/05/2022						
Thursday	12/05/2022	9:00 AM	5:00 PM	8	Continue coding for the new course relationship search function.	The new search function is going to replace the old one with search advice feature, this was adopted by the team last week.	The old search function was finished by using function-based component, whereas the new search function is using class-based component. There are many changes need to be done to transform a function-based component to a class-based component.
Friday	13/05/2022	9:00 AM	5:00 PM	8	Continue coding for the new course relationship search function.	The new search function is going to replace the old one with search advice feature, this was adopted by the team last week.	I finally decided to merge the two buttons (prerequisite search and dependency search) into the new SearchBox component to make the navigation easier. Next will adopt the course search action to make sure the user is using the correct token.
Saturday	14/05/2022						
Sunday	15/05/2022	1:30 PM	5:00 PM	3.5	Finish the rest of the coding tasks for the new search function.	The new search function is going to replace the old one with search advice feature, this was adopted by the team last week.	Successfully adopted the course action component and made sure the user is holding a valid token while submitting data to the backend. Next will do the integration test for the function.
Total				27.5
