

Minutes of the Client Meeting

Team 05

Yiwei Zhang, Shuchen Wu, Yen You Chew

Friday 10th June 2022

Note taking for the meeting:

Shuchen Wu

1 Time and Place

The group meeting for the Master of Computing & Innovation Group Project was held online at 2:00 pm on Friday 10th June 2022.

2 Final demo presentation

2.1 Introduction of the homepage and the project (Shuchen Wu)

2.2 Introduction of the functionality - Course Relationship (Yiwei Zhang)

- Introduce the input, auto-complete
- The target audience of the function
- Feature demonstration: list all the prerequisite and dependency, the grade distribution of all the courses, select/multi-select on the grade

2.3 User case: pretending I am a course coordinator of 2201, show how our product will help with using Course Relationship function (Shuchen Wu)

- How I am going to do the investigation of the course, check the performance of the prerequisite and observe the grade contribution to 2201.
- Select specific grade/grades of the prerequisite and observe the grade contribution to 2201.
- Draw the course relationship conclusion with the observation that I got from our product (Prerequisites search)
- Search for the dependency of 2201 to investigate how 2201 will help students with their further study.
- Click on "good grade" (HD, D) of 2201, and observe the grade distribution of the dependency courses.
- Draw the course relationship conclusion with the observation that I got from our product (dependency search)

2.4 Introduction of the functionality - Course Advisor (Alvin)

- Introduce the input: valid, invalid, empty input handler
- How to read the graph that our product outputs
- How to click on the node to investigate, what the grade represents

2.5 User case: pretending I am a student, show how our product will help with using Course Advisor function (Yan You Chew)

- Input courses:
 - ADSA - 7201 (grade C)
 - Found CS - 7202 (grade HD)
 - CS - 7081 (grade D)
 - OS - 7064 (grade D)
- Investigate node: AI, CNA, Intro Geometric Algorithm

- Explain how the courses that I investigate will help me make the decision of what I shall choose for the next semester.

2.6 Summary (Shuchen Wu)

2 Feedback from client

2.1 Overall feedback

- Clear and nice presentation
- Overall excellent outcome

2.2 What can be improve

- In the extension: for Course Advisor, figure out an extra way to display the potential student learning pathway
