Tuesday 24th May

1 Goal of the week

Finish the development of the Course Advisor function. Mainly targeting on the display page of Course Advisor.

2 Discuss task breakdown and allocation for this week

Below are the parts that need to be optimised.

2.1 The Course Advisor search page should be able to handle invalid input

2.2 The backend Course Advisor search algorithm takes about 4 seconds to respond, which is too inefficient (optimization needed).

2.3 Considering cyber security, we need encryption of the database as well as the user password.
