

MCI Project Weekly Time Sheet

Team 5 Student ID a1686965 Week starting: 25/04/2022

Day	Date	Time In	Time Out	Total hours	Task	How does it fit into project plan?	Outcome/Next action
Monday	25/04/2022	1:30 PM	2:30 PM	1	Group meeting	Get an update with everyone, make sure we are on the same page	In this holiday, we have completed a working website with a login function and a half complete search function. The backend has some more the work on the search api and so is the frontend search api. Our database has to be adjusted a little due to the search api to increase the runtime. Front UI design needs to be changed as well. We decided to change the CSS and use Bootstrap instead.
Tuesday	26/04/2022	10:00 PM	5:00 PM	7	1. Write up the meeting minutes for our group meeting 2. Update the frontend search API	We plan to complete our first function by this week hopefully	We currently have two backend APIs for searching prerequisite courses and searching the grades of the given course with its prerequisite. The idea I have now for the 1st function (course relationship for prerequisite) is that user input a course code (ie 7201), the frontend will call out the 1st API (find the prerequisite of this course) then call out the second API (find the grade of the course having done the prerequisite course). I will try my best to work on this idea this week and hopefully get it done ASAP.
Wednesday	27/04/2022	11:00 AM	1:00 PM	2	Implement the idea I came up yesterday	To complete the search prerequisite function	Found out we need more backend API to do what I want. Have to wait until backend done with the API I requested.
Thursday	28/04/2022	10:00 AM	5:00 PM				
Friday	29/04/2022	10:00 AM	4:00 PM				
Saturday	30/04/2022	2:30 PM	4:00 PM	1.5	Fix frontend issue	If not fixed, Athena's can no longer continue the UI for our frontend	Can't npm start frontend. We found out that proxy is the reason why she can't npm start the frontend. Remove the proxy helps.
Saturday	30/04/2022	10:00 PM	12:30 AM	2.5	Fix frontend issue	If not fixed, Athena's can no longer continue the UI for our frontend	Remove proxy does allow the npm start, however that means we have no way of connecting backend and frontend. Tried a lot of ways (solutions found in stack overflow) but still cannot solve it.
Sunday	1/05/2022	9:30 AM	10:30 AM	1	Meeting with group for updates	Updates on what we did this week and prepare together what to show for client	Discuss the issue Athena's had together but no one seems to know the reason. Prepared things to show to our client.
Sunday	1/05/2022	5:30 PM	10:30 PM	5	Connect the search API	We need the search API to show it to client on Monday's meeting	Connected the Search API, the results from backend was saved in the localhost storage, and was used to make up different Pie Charts and Bar charts. Next Action: Need to make it animated (maybe).
