

Minutes of the Client Meeting

Team 05

Yiwei Zhang, Shuchen Wu, Yen You Chew

Monday 16th May 2022

Note taking for the meeting:

Shuchen Wu

1 Time and Place

The group meeting for the Master of Computing & Innovation Group Project was held online at 1:30 pm on Monday 16th May 2022.

2 Presentation of our website

2.1 Homepage motion effect

2.2 Added hover effect on all the clickable parts

2.3 New search bar with auto complete

2.4 In the prerequisite display, we changed the overall distribution from donut chart into bar chart, based on client's feedback

2.5 In the prerequisite display, if prerequisite course X is clicked, the overall distribution will change to the performance of students who have course X as prerequisite.

2.6 New feature based on client's feedback. In the prerequisite display, if HD grade in prerequisite course X is clicked, the overall distribution will change to the performance of students who have course X as prerequisite and reached HD.

2.7 Dependency display page same content as 1.4, 1.5, 1.6.

3 Plan of next stage

3.1 We will start developing the Course Advisor function from this week on.

4 Feedback from client

4.1 Overall

Our client Nick is very satisfied with our current progress. The current outcome will be useful for our client to show the students visually what performance they will have if they do well/bad in the prerequisite course.

4.1 Improvement

Our client is hoping to have a feature that can not only see the current performance with students who got HD/D/C/P/F in the prerequisite, but also be able to select more than one grade to do the investigation. Since it is an extra requirement from our project scope, we can still focus on the next function. Our client is expecting if we still have time for this project, we can go back and develop this feature.
