MCI Project Weekly Time Sheet

 Team
 5
 Student ID
 a1686965
 Week starting:
 7/03/2022

			Total	How does it fit ito project		
Date	Time In	Time Out	hours	Task	plan?	Outcome/Next action
7/03/2022	12:00:00 PM	4:00 PM	4	Group meeting with my team	Start our project	We manage to discuss our project, had our client meeting (went well), allocated task for each members. My next action is to do research on how to manage/process the deidentified data which will be provided to us by the client.
8/03/2022	8:30 AM	12:30 PM	4	How to process data	Need to find patterns on the data	There are a lot of methods to find patterns. Watched a lof of Youtubes videos about the K-means clustering (Not sure if I am at the right path). Feels like I don't have enough time. Need to allocate my time on doing research about processing data. Maybe Mining Big Data course can help.
8/03/2022	4:00 PM	5:00 PM	1	Do some planing with groups	To come up with a draft for the prototype for our client	We created a project in Github, listed some tasks to work on under Sprint backlog.
9/03/2022	9:00 AM	12:30 PM	3.5	Do research on the SRS of project	Helps the team to save time and fully understand the project	Found a good guide on GeeksforGeeks. Wrote a draft on the SRS. Need more time to finish the whole thing.
10/03/2022	9:30 AM	12:30 PM	3	Working on SRS	Helps the team to save time and fully understand the project	Didn't get to work on the SRS report much, but instead I spent the time revisit the recorded meeting with the client. The main thing is the following: Ingest, storage, analysis, ability to esembly query, ability to represent information i a usefull way which can be interact with.
10/03/2022	1:00 PM	3:30 PM	2.5	Watch youtube guide on MERN Stack	We have decided to use MERN stack for our web application	2 hours video is too much. A lot of information to process. There is another guide video that builds up from this guide video, will put some time on it next week.
11/03/2022	11:00 AM	4:00 PM	5	Go through the UI and prototype slides and prepare for next Tuesday meeting with the client	Preparation for next meeting	The UI looks perfect, the prototype slides is a draft for now but its great. UI is done using Adobe Experience Design. It is best by using chrome to view it. The protptype slides will have best experience when using office 365.
12/03/2022	11:00 AM	1:00 PM	2	Finihs up a draft for SRS	SRS is very important for a project	Done with a draft SRS. Will need to discuss with the team and have them give some suggestions.
