Reason for the change: As we did the user testing of our UI & UX prototype, there is feedback from potential users that wants to have a better way of showing the distribution, better to be visualised. So we improve our design.

1.2 The demonstration of the finished Course Advisor function, the user flow of searching and display.

1.3 New feature added: Course Relationship display, no dependency/prerequisite situation user interface handled

3 Feedback form client

3.1 Our client is satisfied with our progress and outcome. Credit on our improvement of the Course Advisor display.

3.2 Throughout the semester, our client is satisfied with our way of updating the progress with him with visuals of the outcome.
