Minutes of the group meeting

Team 05
Yiwei Zhang, Lei Jin, Shuchen Wu, Yen You Chew
Thursday 31st April 2022

Note taking for the meeting:
Shuchen Wu

1 Time and Place
The group meeting for the Master of Computing & Innovation Group Project was held online at 1:30 pm on Thursday 31st April 2022.

2 Function reducement & adjustment
2.1 Function reducement
We decided to cut off our website's Degree Path and Career Path Navigation functions. This decision needs to be approved by our client Nick. A meeting should be arranged with Nick today.

2.2 Function adjustment (Course Recommendation)
Rename Course Recommendation function to Course Advisor.

2.3 Function adjustment (Course Relationship)
The user motivation of this function is not clear. Therefore, there are different opinions on the activities of Course Relationship.

Opinion 1: The pie charts on the right-hand side should present students' grades for courses 1 - 4. Course coordinators can understand the performance of the prerequisite courses. They can determine whether they should give some extra knowledge related to the prerequisite to let students understand the content better.

Opinion 2: The pie charts on the right-hand side should present students' grades on mining big data for having courses 1 - 4 separately as prerequisites. It will give the course coordinators a better idea of the relationship between courses.

The activities of this function should be discussed with Nick.

2 Business plan

We need to talk to Nick with our question and then changed the business plan.
